HOPI TRIBE – DEPARTMENT OF HEALTH & HUMAN SERVICES COVID-19 EMERGENCY RESPONSE – August 19, 2021 REPORT

KYKOTSMOVI, AZ – August 19, 2021

The information data below can be found on the Hopi Tribe’s website [“COVID-19 Response and Resources”](#) page.

Hopi Health Care Center – Community Vaccination Information

COVID-19 vaccines are available daily for those 12-years old and older.

Call (928) 737-6049/6081/6148 - Appointments preferred, but not required.

Moenkopi residents Tuba City Regional Health Care will have a Pfizer vaccine community drive-up vaccine clinic now available for individual’s 12-years and older. Call 1-866-976-5941 to schedule your appointment.

As of August 19, 2021 the United States now has approximately 37,259 million confirmed positive cases over 623,244 deaths reported.

Over 976,471 confirmed positive cases now exist in Arizona. Of those, close to 17,913 are in Navajo and 19,354 in Coconino Counties.

The Hopi Health Care Center has tested over 10,392 patients to date. Over 1,449 of those tests at Hopi Health Care Center came back positive with 1057 from Hopi Tribal members. Tuba City Regional Health Care Corporation reported 277 positives for Hopi Villages with a combined number of 1,336*** positive Hopi Tribal members.

**Hopi COVID-19 Reported Cases by Hopi Health Care Center Cases*
As of August 18, 2021**

	Number Tested Today	Cumulative Number Positive	Cumulative Number Negative	Total Number in Process	Total Tested
	27	1,449	8,858	14	10,392

Number of Cases per Village	Reported by HHCC	Reported by Tuba City Regional Healthcare Corporation	Total
Kiqötsmovi	109	26	135
Orayvi	29		29
Polacca (Walpi-Sitsom'ovi-Tewa)	290	9	299+
Musangnuvi	96	2	98
Supawlavi	61	1	62+
Songöopavi	225	1	226+
Yuwelu-paki	12		12
Paaqavi	56		56
Hotvela	130	47	177
Keams Canyon	42	10	52
Flagstaff		1	1
Munqapi	1	180*	181*
Phoenix	1		2***
Winslow	4		5***
Prescott	1		1
TOTAL	1057	277	1,336***

*Note: These data include newly added testing results from the Abbott ID NOW machine since April 20, 2020

** A total of 1,336+ individuals who tested positive are members of the Hopi Tribe.

*** Data includes all state-wide data from other facilities such as Flagstaff, Winslow, Phoenix or other hospitals.
+ Includes Village member(s) retested positive.

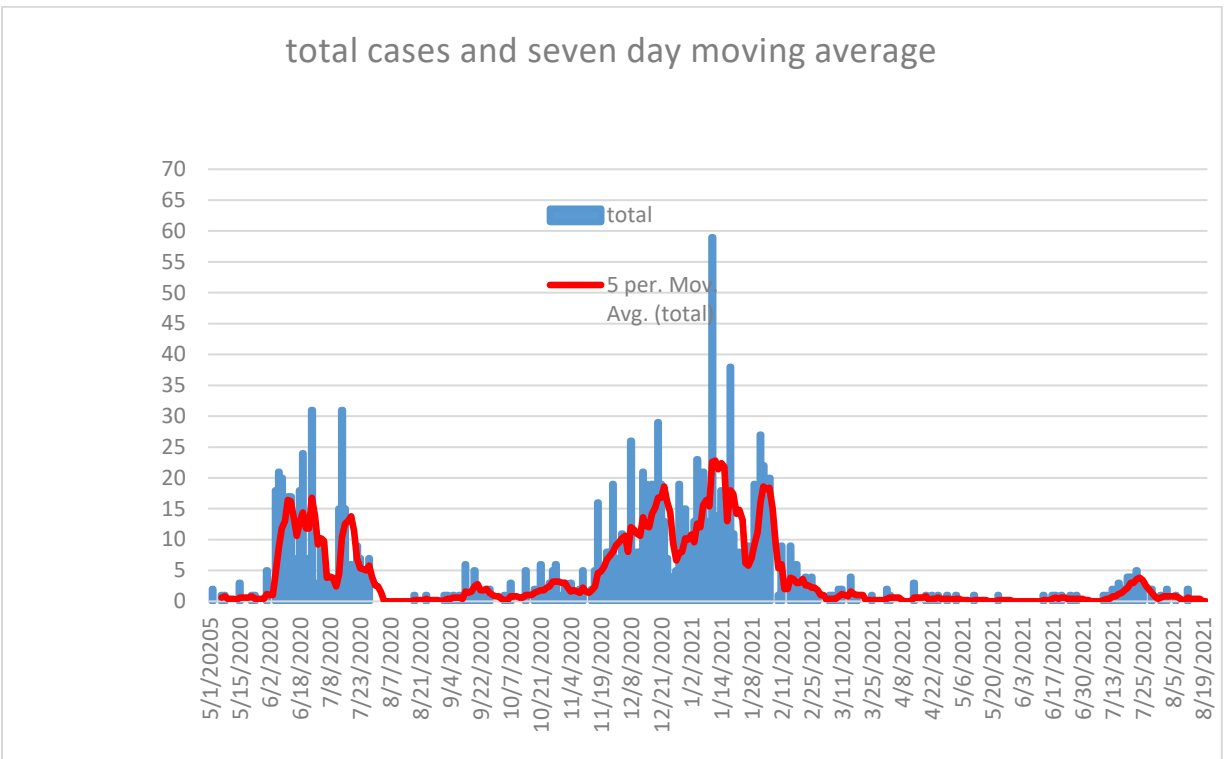

Prevention:

Watch for Symptoms - people with COVID-19 have had a wide range of symptoms reported – ranging from mild symptoms to severe illness. Symptoms may appear 2-10 days after exposure to the virus. Anyone can have mild to severe symptoms. People with these symptoms may have COVID-19:

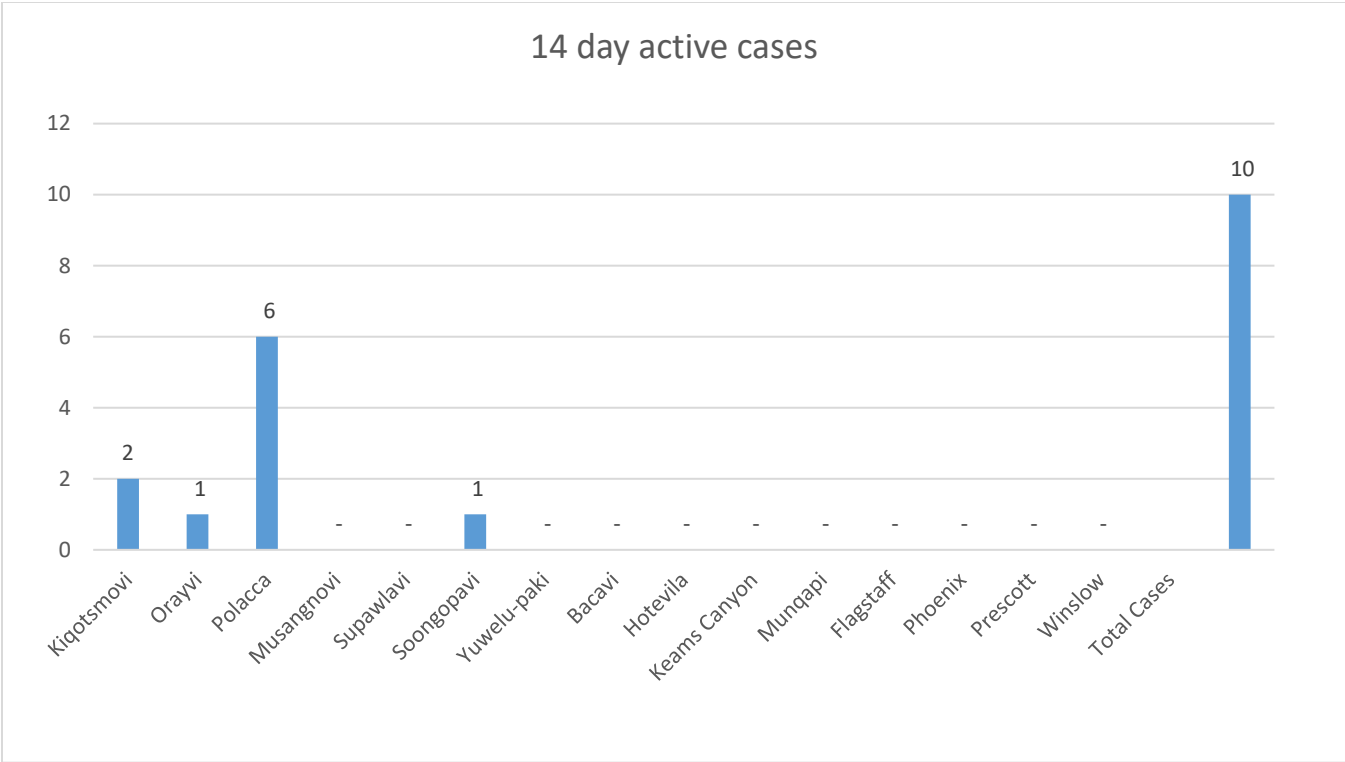

- Fever or chills
- Cough
- Shortness of breath or difficulty breathing
- Fatigue
- Muscle or body aches
- Headache
- New loss of taste or smell
- Sore throat
- Congestion or runny nose
- Nausea or vomiting
- Diarrhea

This list does not include all possible symptoms. CDC will continue to update this list as we learn more about COVID-19. Older adults and people who have severe underlying medical conditions like heart or lung disease or diabetes seem to be at higher risk for developing more serious complications from COVID-19 illness.

Education:

This graph demonstrates that cases per day stratified by village with a total case line and rolling seven-day line. This graph gives the total of positive cases for the day in a blue bar graph. The red line is the moving 7-day incidence average and demonstrates the general trend of Covid-19 of the community.

This graph demonstrates the active cases and is stratified by village. Currently there are 10 active cases that are defined as persons that have had a positive test result or symptom onset in the last 14 days. In this graph, the Total cases bar is all villages combined and should be excluded from the remainder of the graph. This graph is useful in isolating where the virus is most active at the current moment.

Vaccination Data as of August 19, 2021

Village	Population Estimate	Number Vaccinated*	Percent of population vaccinated	Vaccine Ranking Highest=1
Bacavi	337	197	58.45%	7
Hotevilla	871	522	59.93%	5
Kykotsmovi	709	537	75.74%	2
Mushongovi	679	293	43.15%	9
Moenkopi	1,146	729	63.61%	4
Orayvi	103	100	97.08%	1
Shungopavi	1,013	664	65.05%	3
Sipalwavi	371	202	54.44%	8
Polacca	1,908	1,134	59.43%	6
Total*	7137**	4,378	61.34%	

This Table looks at both cases per capita for the Tribe and persons that have received at a least one dose of the vaccine since the beginning of the pandemic. The village populations were calculated from the enrolment data from the tribe and is simply a rough estimate.

*Excludes the vaccines from Keams Canyon, Spider Mound, and those calculated as Second Mesa. The three groups combine for another 426 Hopi Tribal members who have received at least the first dose of the vaccine.

Total reservation percent vaccinated ~**67.31%** Eligible population vaccinated ** ~**74.63%**

**Eligible population is 6437, population older than 12

Village	Most recent case
1. Kykotsmovi	August 18th
2. Shungopavi	August 18th
3. Polacca	August 18th
4. Orayvi	August 13th
5. Hotevilla	August 6 th
6. Sipalwavi	August 3rd
7. Moenkopi	August 2nd
8. Mishongnovi	July 28th
9. Phoenix	July 23rd
10. Bacavi	July 22nd
11. Winslow	July 15th
12. Keams Canyon	April 14 th
13. Spider Mound	January 13 th

Color Code: **Red-** Less than one month since last case.
Blue- Between one and two months since the last case
Yellow- Between two and three months since last case
Green- Greater than three months since last case.
